1 Education

Doctor of Philosophy: Queensland University of Technology **2024 – Present**

- Thesis: “On Examining Poor Statistical Practices in Published Clinical Prediction Model Research”

Master of Philosophy: Queensland University of Technology **2022 – 2024**

- Thesis: “Standard Distance Triathlon: Examining Participation and Success, Predictive Performance Insights and Environmental Effects”

Bachelor of Biomedical Science: Queensland University of Technology **2019 – 2021**

- With distinction

2 Employment & Experience

PhD Candidate: Queensland University of Technology **Jul 2024 – Present**

- Successfully awarded a competitive scholarship valued at >\$126,632 for exceptional research potential.
- Understanding of Australian medical policy and Therapeutic Goods Administration legislation in the application of clinical prediction models and software and medical devices.
- My research updated two global research guidelines, have consulted with government and non-government institutions to update policy for Australian and global data provenance protections.
- Given invited and selected talks at the Institute for Evidence Based Healthcare, Association for Interdisciplinary Metaresearch and Open Science, University School Forums and Metascience Matters podcast.

HDR & Management Committee: AusHSI **Aug 2024 – Present**

- Responsible for the representation of ~40 HDR students as well as ensuring the management, governance and strategic alignment AusHSI internally at QUT and in higher education.
- Chaired and co-chaired group meetings and workshop sessions for academic and professional development.
- Lead the organisation, management and development of professional development sessions.

Research Assistant: AusHSI **Jan 2025 – Mar 2026**

- Funded research project titled: “Statistical Thinking In High-Performance Sport”.
- Working with the Chief Scientific Officer and Scientific Advisor of the Australian Institute of Sport to evaluate the quality of research produced by Australian Institute of Sport to update practice.
- Focused on the development, pilot and collection of data for the study as well as write up.

Clinical Research Assistant: Queensland University of Technology **Apr 2023 – Dec 2024**

- First round human clinical trial of micro-wearable biomedical technology.
- Management and conduct of clinical procedures, testing, safety, analyses and data management.
- Coordination and logistics management between sponsor personnel, internal colleagues and resources to meet timeline and budget targets.

Laboratory Assistant: Sullivan Nicolaides Pathology **Jun 2022 – May 2023**

- Leading local data collection for a partnered Franklin.ai \$130 million joint AI venture.
- Developed and implemented manufacturing processes to improve data throughput by over 35%.

3 Selected Research Outputs

My research has updated the Collection of Open Science Integrity Guides, The TRIPOD+AI guidelines, retracted numerous articles from the scientific literature and been featured in Nature and Retraction Watch.

3.1 Research

Gibson, AD., White, NM., Collins, GS., Barnett, A. (2025). Evidence of Unreliable Data and Poor Data Provenance in Clinical Prediction Model Research and Clinical Practice. *medRxiv*.
DOI: 10.64898/2026.02.24.26347028

Gibson, AD., White, NW., Borg, DN., Barnett, A. (2026). Examining Hacking Practices in Published Clinical Prediction Models: A Protocol for a Cross-Sectional Observational Study. *OSF*.
DOI: 10.17605/OSF.IO/B6RHJ

3.2 News

Basu, M. (2026). Dozens of AI Disease-Prediction Models Were Trained on Dubious Data. *Nature*, News, 15 April 2026. www.nature.com

Youshajekian, L. (2026). ‘Comically Bad’ Datasets Used to Train Clinical Models for Stroke and Diabetes. *Retraction Watch*, 18 May 2026. Access: www.retractionwatch.com

3.3 Blogs
